CEO comments

President and CEO Alf Göransson reported on Securitas administration during the year 2006 and commented further work within Securitas. The script and the presentation are to be found in complete versions at www.securitas.com. The quotas below are from the script and refer to the operations:

"My impression is that our US organization is strong and well organized, and that the acquisitions carried out from 1999 to 2001 that have made Securitas the market leader, are now truly together under one and the same flag and that management has successfully corralled the operations' history and diverse roots under the Securitas banner. We are well equipped to take on new challenges in the USA".

"During the past year, management in Europe has divided operations and organized them to serve customers – with permanent guarding for large customers, and patrolling and electronic alarm monitoring for small and medium-sized customers. This specialization improves each area's ability to develop its services, increase its growth and create a focus within Securitas to develop the right type of customer service – regardless of whether it concerns a large multinational corporation, a small store in a large city or rural community, or a security installation installed by a third party".

"As regards Loomis – the Securitas cash management services and secure transportation operations – we intend to divest the division to shareholders and list the operation on the stock market in the second half of the year, following the same procedure as was used for Systems and Direct. This time plan is however dependent on stability in the UK cash management operation".

"We have begun the process of taking the Securitas strategy one step further, and I intend to summarize and present this endeavor, providing more substance and concrete examples, in conjunction with the presentation of our six-month interim report in August".
